

**NUCLEAR REGULATORY COMMISSION****[Docket No. 50-461]****Illinois Power; Clinton Power Station, Environmental Assessment and Finding of No Significant Impact**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-62, issued to Illinois Power (the licensee), for operation of the Clinton Power Station located in DeWitt County, Illinois.

**Environmental Assessment***Identification of the Proposed Action*

The proposed action is in accordance with the licensee's application for amendment dated May 4, 1998, and would incorporate Technical Specifications requirements for the protection systems for the new static VAR compensators being installed onsite to address degraded electrical grid voltage.

*The Need for the Proposed Action*

The proposed action is needed as part of the solution to address degraded electrical grid voltage at Clinton Power Station.

*Environmental Impacts of the Proposed Action*

The Commission has completed its evaluation of the proposed action and concludes that the change will improve the plant's capability to handle degraded grid voltage. The change will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable occupational or public radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does involve features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other nonradiological environmental impact.

Accordingly, the Commission concludes that there are no significant environmental impacts associated with the proposed action.

*Alternatives to the Proposed Action*

Since the Commission has concluded there is no significant environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

*Alternative Use of Resources:*

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Clinton Power Station (NUREG-0854, May 1982).

*Agencies and Persons Consulted:*

In accordance with its stated policy, on June 11, 1998, the staff consulted with the Illinois State official, F. Nizidlek of the Illinois Department of Nuclear Safety, regarding the environmental impact of the proposed action. The State official had no comments.

**Finding of No Significant Impact**

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated May 4, 1998, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Vespasian Warner Public Library, 310 N. Quincy Street, Clinton, IL 61727.

Dated at Rockville, Maryland, this 7th day of August 1998.

For the Nuclear Regulatory Commission.

**Jon B. Hopkins,**

*Senior Project Manager, Project Directorate III-3, Division of Reactor Projects—III/IV, Office of Nuclear Reactor Regulation.*

BILLING CODE 7590-01-P

**SECURITIES AND EXCHANGE COMMISSION****[File No. 5001-1]****Order of Suspension of Trading; Eventemp Corporation**

August 10, 1998.

It appears to the Securities and Exchange Commission that there is a lack of current and accurate information concerning the securities of Eventemp Corporation ("Eventemp"), a Scottsdale, Arizona-based company which holds itself out to be the developer of a self contained climate control system for automobiles. There are questions regarding the accuracy and adequacy of publicly disseminated information concerning, among other things, a purported contract with a national car dealership group to purchase the climate control system, and other orders and commitments for the system.

The Commission is of the opinion that the public interest and the protection of investors require a suspension of trading in the securities of the above-listed company.

Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, that trading in the above-listed company is suspended for the period from 9:30 a.m. EST, August 10, 1998 through 11:50 p.m. EST, on August 21, 1998.

By the Commission.

**Margaret H. McFarland,**

*Deputy Secretary.*
